Seven speakers and 100 W to fill your home with the best sound

TOWER SYSTEM

ENERGY TOWER 8

ENERGY SYSTEM

The quality and sound power you want in a 100 W RMS sound tower with multidirectional and surround sound.

W.S.E. A new concept of sound

Wide Sound Experience:
Project your sound 270
degrees. 100W sound
power, seven-speaker 2.1
configuration and different
types of equalization that
will make you live a unique
experience listening to your
music.

Playback versatility

Listen to your favourite artists in the way you prefer. Use SD cards, USB sticks or the audio-in input.
You can also tune the radio to listen to your favourite stations.

Everything under control

The Bluetooth technology makes it easy, control the playback of your songs from your smartphone or tablet and if you prefer, use the remote control.

We do it simple for you

Design and functionality together. Control all the functions of your tower with a soft touch on the touch panel. Its top dock will allow you to place your devices while you charge your smartphone or tablet with the USB port without interrupting your music.
